

## Don't fall into the QAPI trap

Avoid significant CMS sanctions while improving performance and safety

February 20, 2025

The webinar will start at the top of the hour.

## Navigating the Zoom interface

### Handouts:

Check the chat function for copies of the slides for note taking and any other handouts.

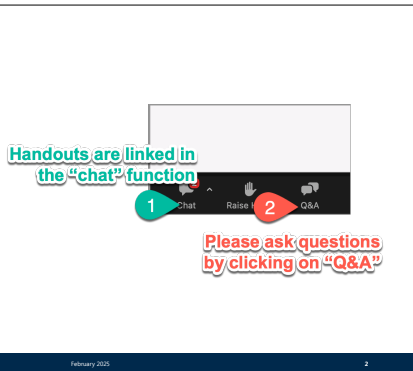

### Questions and comments:

Please participate in the discussion by asking question through the Q&A function during the webinar.

There will also be a survey you will receive immediately after the webinar that will give you an opportunity to ask additional questions or make comments.

Any questions not answered during the webinar will be addressed in a follow-up email or posting.

Healthcare challenges are not siloed.  
*Neither are we.*

Chartis has **six lines of business** that together craft **singular solutions**.

- 1000+ Professionals
- Mission: to materially improve healthcare
- Ranked Best Overall Management Consulting Firm by KLAS
- Chartis acquires Greeley in 2019
- Greeley brand brought back in 2024 to cover Medical Staff Services Related Offerings and now part of Clinical Transformation

Today's *discussion* 8

This is a continuation of our QAPI series. Our panel will discuss common failure points and practical approaches to implement a comprehensive and effective quality and safety program.

**Joshua Cartwright**  
DHA, MHL, CPHQ, FACHDM  
Associate Partner,  
High Reliability Care & Compliance

**Kelsey McGinty**

Objectives 9

Attendees will be able to:

- ✓ Gain a deep understanding of basic requirements and other information from **previous webinars**
- ✓ Learn from the **mistakes of others** and avoid serious consequences to Medicare and Medicaid fundings
- ✓ Implement successful and practical approaches to ensuring your program touches the **scope** of care and services; monitor **contract** services without engaging in overkill; resolve persistent **poor performance**; **unify** and simplify various elements of the quality and safety program; obtain meaningful involvement of and oversight by hospital **executives** and the governing body
- ✓ Leverage **adverse event reporting** to obtain meaningful information about departmental performance

Program slides, CMS interpretive guidelines, the OIG report, and other materials are shared as a PDF in the Chat function for live attendees.  
Handouts will be linked to the Chartis Website for post-webinar streamers.

**Better Meetings: Better Results**  
Clinical Quality Insights

**LEARNING OBJECTIVES**

- Identify and describe common meeting quality and effectiveness challenges.
- Understand meeting effectiveness metrics.
- Recognize meeting quality and effectiveness challenges.
- Track AHA and "How the Star" or "Starburst" metrics.

**HEALTH CLINICAL QUALITY SOLUTIONS**

**PANELISTS**

- Dr. Paul Kelly, Vice President of Operations & Learning, Clinical Compliance and Regulatory
- Liz Kelly, Director, Risk, Clinical

- The fundamental tactic for providing oversight and getting things done
- Do more with less meeting time
- Cut turn-around time in half

A slide with a white background and a photograph of a woman in a tan blazer working on a laptop at a desk. The text on the left lists what hospital executives know immediately and where they are vague. A small number "20" is in the bottom right corner.

**Hospital executives**

**WHAT THEY KNOW IMMEDIATELY**

- Revenue
- Budget
- Vacancies
- Capital projects
- Strategic alliances
- Star rating
- Satisfaction

**WHERE THEY ARE VAGUE**

- Departmental performance
- At-risk processes
- QAPI
- Patient safety

A slide with a dark blue background and a photograph of three healthcare workers in scrubs walking in a hospital hallway. The text on the right explains the concept of zero harm. A small number "21" is in the bottom right corner.

**Zero harm *does not mean* zero incident reports**

- To approach zero harm one must increase the reporting of all events and unsafe conditions.
- Many hospitals fail to accurately message this concept.

## About adverse events

22

## Connecting with executive leadership

23

## Compliance as a byproduct of quality, safety, and efficiency

Simply implementing a process to meet a requirement does not always result in quality, safety, or efficiency. However, implementing systems that support and sustain all three - quality, safety, and efficiency - leads to sustained compliance.

# Avoiding myth

25

---

---

---

---

---

---

---

---

---

---

## Common QAPI failure points

- **Scope:** Lack of attention to the performance of all parts of the organization, not just those with public benchmarks.
- **Contract monitoring:** Due to pervasive misunderstandings of the actual requirement, contracted services are not monitored correctly.
- **Poor performance:** Tolerance for persistently poor performance on departmental or service indicators.
- **Fragmentation:** Lack of integration of non-clinical services (e.g., environment of care) and functions with specific monitoring requirements (e.g., medication safety, antibiotic stewardship, workplace violence, maternal safety) within the QAPI structure.
- **Executive and board focus:** Absence of an effective mechanism for hospital executive and the governing body to oversee all aspects of the QAPI program.
- **Oversight:** Ineffective oversight meetings without a credible process for data analysis (conclusions), accountability for actions, and follow-up to make sure actions taken were effective.

Modern QAPI programs tend to focus on Hospital-Acquired Conditions (HAC penalties) and other Hospital Compare and Pay for Performance indicators rather than the entire scope of services.

Medical error reduction (patient safety) programs often suffer due to a priority on analyzing significant harm events rather than permanently fixing the underlying process flaws that caused them.

---

---

---

---

---

---

---

---

---

## Contract monitoring

- Participation in the QAPI program is required for contracted services (NOT purchase agreements).
- Contracted services must be provided in compliance with federal regulations, including the Medicare Conditions of Participation.
- The Board must oversee the degree to which individual contractors meet regulatory and internal expectations.
  - Inventory of contracted services.
  - Very brief annual review of each contract:
    - Meets expectations in the contract.
    - Does not meet expectations (Explain)
  - Actions taken when expectations not met*
- **DO NOT** make indicators part of the contracting process. Leave that to the quality and safety program. Instead, require that contractors fully participate in QAPI, including the collection and reporting of indicators and other information required by the approved QAPI plan.

**MYTH:**  
the contract or an attachment to the contract must include indicators.

**REALITY:**  
the contract must include the scope of services provided and performance expectations (NOT indicators).

**EXAMPLES:**  
"participate in the QAPI program"  
"provide services in compliance with the Conditions of Participation"

---

---

---

---

---

## Poor performance

- Don't measure it if you don't intend to improve sub-threshold performance.
- Better to have one concurrent and overarching monitor than 10 retrospective chart review indicators that do not get to the actual safety issue.

### Example: Monitoring of Restraint

- **Documentation of Monitoring** (retrospective chart review)  
April: 75%, May 80%, June 70%, July 75% ... etc.
- **Face to Face Evaluation within 1 hour of application / Violent Restraint** (retrospective chart review)  
April: 75%, May 80%, June 70%, July 75% ... etc.
- **Appropriateness of Restraint** (concurrent care facilitation)  
"Yes" plus "No-Corrected"  
April: 97%, May 95%, June 98%, July 100% ... etc.
- **Safety of Restraint Method** (concurrent care facilitation)  
"Yes" plus "No-Corrected"  
April: 100%, May 100%, June 100%, July 100% ... etc.

28

## Fragmentation

All performance related issues should be part of the overarching quality and safety plan

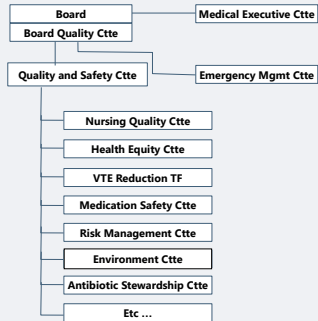

- Board Quality Ctte
- Medical Executive Ctte
- Quality and Safety Ctte
- Environment Ctte
- Emergency Mgmt Ctte
- Health Equity Ctte
- VTE Reduction TF
- Medication Safety Ctte
- Nursing Quality Ctte
- Risk Management Ctte
- Antibiotic Stewardship Ctte
- Etc ...

29

## Reducing Fragmentation

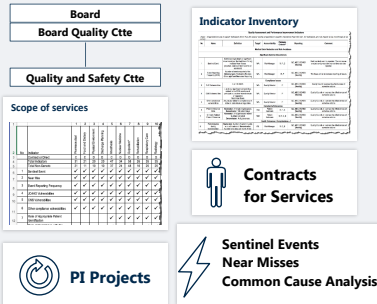

All performance related issues should be part of the overarching quality and safety plan

30

## Involvement of the governing body

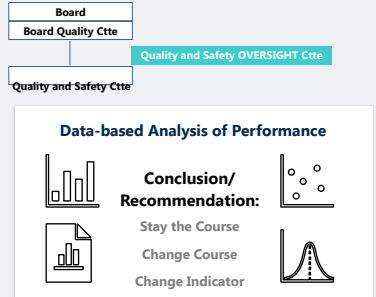

The Board must expand its focus beyond benchmark Indicators

31

## Involvement of the governing body

The Board must expand its focus beyond benchmark Indicators

32

## Oversight

The size and number of committees renders them ineffective for the purpose of performance oversight. We recommend an executive team to oversee performance before issues go to the Board.

### Quality and Safety Oversight Committee

- Executive level – a quality and safety focused “A Team”
- Assign Accountabilities
- Prioritize
- Allocate Resources
- React Quickly to Threats and Opportunities

### Tools:

- Each agenda item with
  - Objective: why is this on the agenda
  - Analysis-based recommendation
- Accountability tracking tool with follow-up
- Agenda becomes minutes at the end of the meeting

### All agenda items are “action ready.”

- If there is no recommended action, the issue is not ready to go to the committee.
- This is not a problem-solving group.
- QSOC acts on recommendations and ensures accountabilities are realized.

**Twice as much accomplished in half the meeting time.**

**Issue TAT decreased by 70%**

33

## Compliance as a byproduct of quality, safety, and efficiency

Simply implementing a process to meet a requirement does not always result in quality, safety, or efficiency. However, implementing systems that support and sustain all three - quality, safety, and efficiency - leads to sustained compliance.
